CAREER OBJECTIVE

- Dedicated to perpetual learning, pursuing excellence in emerging technologies, and fostering my personal development through diligence, all with the growth and success of the organization.

EDUCATION

The University of Kalyani	Aug 2023
Master of Computer Applications	*Percentage : 75%*
Mankar College	Aug 2021
Bachelor of Science in Computer Science	*CGPA: 8.1/10*

SKILLS

Languages: ASP.NET, C/C++, Java, Python, JavaScript, HTML, CSS, MSSQL

Tools: Git/GitHub, SSMS, Visual Studio, VS Code, MongoDB Compass

Frameworks/Platform: Nodejs, Express, Django,

Libraries: React, Pandas, Numpy, Matplotlib, Seaborn

Subjects : DBMS, Data Structure and Algorithm

EXPERIENCE

National Informatics Centre(Kolkata) | *Software Developer*   April 2024 - Present

- collaborated with a dynamic team at NIC to develop ASP.NET software solutions, utilizing VB.NET for backend processes and SQL Server for robust database management. Specializes in full-stack development, crafting user-friendly web interfaces, and implementing intricate business logic for transport and stock management functionalities.
- Actively participating in the development lifecycle and encouraging teamwork to meet project objectives. Exhibited a strong desire to learn new things and improve one's technical abilities while assisting in the smooth integration of front-end and back-end software components..

Authentech Software Solution Pvt.Ltd.(Kolkata) | *Trainee Software Developer*   September 2021- February 2022

- Showed exceptional teamwork and time management skills when creating web applications in ASP.NET UIs with HTML, CSS, and JavaScript. I also gained knowledge in managing databases with SQL Server and made contributions to desktop apps with VB.NET and Windows Forms.

PROJECTS

LittleTalk | *React, HTML/CSS, Socket.io, Mongodb*   Dec 2023 – Present
- LittleTalk is a messaging platform that meets short-term and long-term social media needs by letting users create temporary or permanent accounts.

Empowering E-commerce Businesses | *React, HTML/CSS, Express js, VS Code, MongoDB*   Oct 2022 – Jun 2023
- Developed an e-commerce platform using ReactJS for user interface and NodeJS for backend development, with a focus on effective UI component building and user experience enhancements via virtual DOM and unidirectional data flow.

ACHIEVEMENTS/TRAINING

- 11 Weeks Workshop on Data Structures and Algorithms - Geeksforgeeks
- Placement Preparation Program - Knowledge Gate
- Received a scholarship from the SVMCM Scholarship for my outstanding performance in BSc Computer Science.
- JECA (Joint Entrance for Computer Applications) Rank: 433
